

# ECAP615

## Programming in Java

Harjinder Kaur  
Assistant Professor

# Learning Outcomes

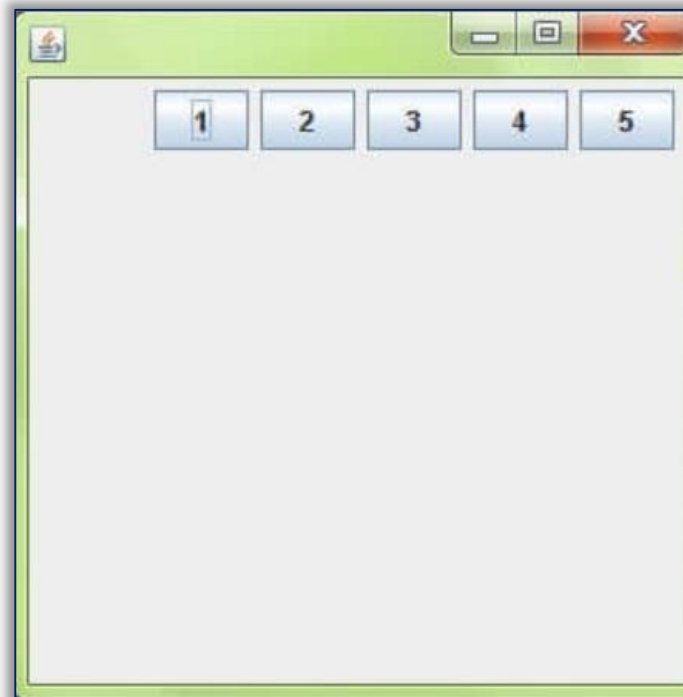

After this lecture, you will be able to

- learn the basic concept of FlowLayout
- understand the various constructors and methods of FlowLayout
- implementation of FlowLayout

# FlowLayout

- The FlowLayout is used to arrange the components in a line, one after another .
- It is the default layout of applet or panel.

# Variables

- LEFT
- CENTER
- RIGHT

# Constructors of FlowLayout

- `FlowLayout()`
- `FlowLayout(int align)`
- `FlowLayout(int align, int HorizontalGap, int VerticalGap )`
- `JLabel(String text)`

# Methods used in FlowLayout

- setTitle(String Text)
- getAlignment()
- setAlignment(int align)
- removeLayoutComponent(Component comp) :

**That's all for now...**
